

41479

**B. Pharma 4th Semester
(Regular/Re-appear/Impr.)
Examination – May, 2024**

PHARMACOLOGY-I

Paper : BP404T

Time : Three Hours]

[Maximum Marks : 75

Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination.

Note : Section-A is *compulsory* consisting of twenty questions carrying 1 mark each. Section-B contains three questions carrying 10 marks each and students have to attempt any *two* questions. Section-C contains nine questions carrying 5 marks each and students have to attempt any *seven* questions.

SECTION – A

1. Multiple choice questions : 20 × 1 = 20
- (a) Which is the biggest family in receptors ?
- (i) GPCR
 - (ii) GABA
 - (iii) Muscranic receptors
 - (iv) None of these

- (b) Phase II reaction of a drug biotransformation
- (i) Usually leads to inactivation of drug
 - (ii) Decreases its water solubility
 - (iii) Increase drug absorption
 - (iv) none of these
- (c) A drug from both human & animal source is :
- (i) Insulin
 - (ii) Morphine
 - (iii) Chloroquine
 - (iv) PCM
- (d) Drug is classified by the following method :
- (i) Manufacturer
 - (ii) Mechanism of action
 - (iii) Metabolism
 - (iv) Excretion
- (e) A drug given by which route could theoretically reach high plasma concentration and have 100% bioavailability :
- (i) Oral
 - (ii) Injection
 - (iii) Suspension
 - (iv) Rectal

(f) Select the diuretics which is orally active, efficacious in acidosis as well as alkalosis, cause diuretics even in renal failure and has additional carbonic anhydrase inhibitory action.

(i) Furosemide

(ii) Mannitol

(iii) Dopamine

(iv) Amantadine

(g) The primary site of action of thiazide diuretics is :

(i) Cortical diluting segment

(ii) Proximal tubule

(iii) Loop of henle

(iv) None of these

(h) Substance secreted in to the blood by a neurons is :

(i) Neurohormone

(ii) Neuromodulator

(iii) Neuromediator

(iv) Neurotransmitter

- (i) cAMP is an example of :
- (i) Neurohormone
 - (ii) Neuromodulator
 - (iii) Neuromediator
 - (iv) Neurotransmitter
- (j) Anti TB drug that has bacteriocidal and sterilizing effect on tissue is :
- (i) Rifampicin
 - (ii) INH
 - (iii) Lidocaine
 - (iv) salbutamol
- (k) Toxicology science deals with ?
- (i) Poisons
 - (ii) Potency
 - (iii) Stability
 - (iv) none of these
- (l) Clinical thermometer is used to measure :
- (i) Freezing point of water
 - (ii) Measure both (i) & (ii)
 - (iii) Body temperature
 - (iv) None of these

- (m) Highly ionized drug :
- (i) Is excreted by kidney
 - (ii) Is excreted by sweat
 - (iii) Is highly protein bound
 - (iv) None of these
- (n) First pass metabolism occurs in :
- (i) Lungs
 - (ii) Skin
 - (iii) Liver and intestinal wall
 - (iv) None of these
- (o) Chloroquine is used to treat :
- (i) Stomatitis
 - (ii) Diabetes
 - (iii) Malaria
 - (iv) None of these
- (p) Condition lack of sleep is called :
- (i) Insomnia
 - (ii) Dizziness
 - (iii) Anxiety
 - (iv) None of these

- (q) Insulin is secreted by :
- (i) Islet of Langerhans
 - (ii) Kidney
 - (iii) Liver
 - (iv) None of these
- (r) Which tissue has the greatest capacity to bio-transform drugs ?
- (i) Brain
 - (ii) Kidney
 - (iii) Liver
 - (iv) None of these
- (s) A patient having obesity requires dose ?
- (i) Normal Size
 - (ii) Reduced dose
 - (iii) Large dose
 - (iv) none of these
- (t) Which is not the example of intravenous anaesthetics drugs ?
- (i) Barbiturates
 - (ii) Opioids
 - (iii) Ketamine
 - (iv) Paracetamol

SECTION – B $2 \times 10 = 20$

2. (a) Discuss different factors modifying drug action.
- (b) Write the classification of antiepileptic drugs.
Explain the mechanism of action of any four anti-epileptic drugs.
- (c) Classify sedatives and hypnotics. Write M.O.A. 
adverse effect and uses of benzodiazepines.

SECTION – C $7 \times 5 = 35$

3. (a) Classify Sedatives. Write down the differences between benzodiazepines and barbiturates.
- (b) Write a short note on Nootropics.
-  (c) Write down the classification of antidepressants and anti-anxiety agents.
-  (d) Write a note on combined effects of drugs.
-  (e) Discuss the mechanism of action, uses and side effects of D-Tubocurarine.

41479

(f) Write a note on Neurohumoral transmission in the C.N.S.

(g) Briefly enumerate about the different phases of clinical trial.

(h) Write a note on General Anesthetics.

(i) Write a note on Drug interaction.

Indira Gandhi University, Meerpur, Rewari
Department of Pharmaceutical Sciences
B. Pharm. 4th Sem, 2nd Sessional Exam April 2024
Pharmacology- I (BP404T)

Time: 1.5 Hrs

Max. Marks: 30

SECTION-A

Attempt all Questions. Each question carry 2 Marks.

2X5=10

Write a note on the following-

1. Neuromuscular blocking agents
2. Pharmacological actions of morphine
3. MOA of disulfiram
4. Classification of anti- anxiety drugs
5. MOA of Local Anaesthetics

SECTION-B

Short Answer Questions. Attempt any 2 out of three.

5X2=10

1. Classify anti- depressant drugs. Discuss the MOA, adverse effects and uses of Tricyclic anti-depressants?
2. Classify sedative and hypnotics. Mention the pharmacological actions and MOA of barbiturates?
3. Discuss the management of Glaucoma?

SECTION-C

Long Answer type Question. Attempt any one out of two

10X1=10

1. Define Parkinson's Disease. Classify anti- Parkinson's agents. Discuss the pharmacology of Levodopa and Entacapone?
2. Define various types of epilepsy. Classify anti- epileptic agents. Discuss the pharmacology of any two classes of anti- epileptic agents?

Indira Gandhi University, Meerpur, Rewari
Department of Pharmaceutical Sciences
B Pharma 2nd Semester, 1st Sessional Examination, 2024
Paper Code- BP 404 T PHARMACOLOGY-I
Total marks: 30

Duration: 1.5 Hrs.

Question no.1 is compulsory.

2x5=10 marks

1. What is Tachyphylaxis?
2. Factors affecting Absorption?
3. What is therapeutic index?
4. Classification of receptors?
5. Classification of neurotransmitters?

Q2. Attempt anyone questions from the rest

10x1=10 marks

1. Describe in detail about Neurohumoral transmission and Parasympathetics system?
2. Write in details about G-protein-coupled receptors and transmembrane JAK-STAT binding receptor?

Q3. Attempt any two questions from the rest

5x2=10 marks

1. Write a short note on Receptor theories and Adverse drug reactions?
2. Write a short note on metabolism and excretion of drugs?
3. Discuss about Drug discovery and clinical evaluation of new drugs?
